

MOHAMED INSHAF

SOFTWARE ENGINEER

About

A highly motivated computer science graduate. Quick learner with strong problem solving skill. A team player, who is able to provide simple solutions to complex problems through creativity. Enthusiast to learn new things and technologies.

Web development | Mobile application development | DevOps

Experience

- React Native Developer
Well Technologies - Flash App
(Nov 2022 - present)
Directly collaborate with team to design, develop and release the application using agile methodology. Develop UI screens and integrate APIs.

Projects

- ASTHMA CONTROL TOOL
Client : Medical faculty of university of jaffna.
Android application with MCQ questions. Based on answers patients can control their asthma level.
Tech used - React Native, Firebase
- TODO APPLICATION
User can plan their daily tasks by adding new tasks, filtering completed tasks and more.
User can register and login their accounts.
Github repo- <https://github.com/minshaf998/ToDo.git>
Tech used : React, Node, Mongodb, Express, JWT token, Mongoose, Joi, bcrypt
Containerized the application using Docker and deployed to AWS EC2 instance using nginx server, Created CI/CD pipeline with Gitlab.

Education

- Bachelor Of Science in Computer Science
University of jaffna
Oct 2019 - Oct 2022
- G.C.E Advanced Level
Royal college colombo
2009 - 2017

Achievements

NBQSA 2022 - Participated
SREHACK'21 - Fifth Place
Google Hash Code 2021 - Participated

Programming languages and Technologies
Javascript, Python, Java,
React, ReactNative, Node, Express,
MongoDB, Docker, Ubuntu, Bash
